

Cargo of Clouds Intervention using devices

Anne La Berge - concept and text
Timo Hoogland - programmer

The text can be spoken as written or improvised depending on the performance situation and the intervention circumstances. It is also possible to invite the audience to access the code on their devices and participate in the viewing and reading.

This extra layer to the audio and video in Cargo-of-Clouds invites the audience to reflect on conditions around the world while viewing their immediate surroundings.

Go here on your phone or other device in the browser:

<https://www.annelaberge.com/cargo-of-clouds/>

Allow your camera to be used.

You may need to refresh the video.

Flipping from vertical to horizontal view should automatically reload the camera to reset the aspect ratio. This still works best in Safari but works well on Androids also.

The weather report of cities from around the world changes every 10 seconds.

The text will scroll when you swipe from one screen to the next.

You can scroll forward and backward through the text by touching or clicking on the right and left sides of your screen.
